EXPERIENCE

Web3 Frontend Engineer Intern

March 2024 – April 2024

Laika AI

India

- Created pages for the **Chrome Extension** to display a list of **NFT(s)** connected to the given **Web3** wallet address.
- Utilized **React** and **Recharts** to generate **charts** that display useful information related to everything **Crypto**
- Brainstormed through the ideas such as **Error Boundaries** and implemented it into the application to gracefully handle errors and crashes, which increased user retention by **90%**

Freelance Web Developer

August 2023 – December 2023

RevenantZ

India

- Built a comprehensive web application for a 5,000+ gamer esports community, featuring real-time leaderboards, performance analytics, and social features using **React** and **Node**
- Leveraged RESTful APIs to deliver real-time data for leaderboards and performance analytics, empowering e-sports players (**30% engagement increase**) to track progress, analyze gameplay, and connect with gamers
- Established a robust deployment pipeline using **GitHub Actions** to automate the deployment process on a **Linux-based VPS** configured with **Apache** web server

Full Stack Engineer

August 2022 – April 2023

BlobCity

Mumbai, India

- Enabled real-time monitoring, remote power control, and dynamic GPU tier allocation, streamlining cloud-book management using **Angular**
- Single-handedly spearheaded the integration of a new **data visualization library** into the modules, resulting in a **50% increase** in loading efficiency
- Modified **NodeJS** and **Java APIs** to facilitate token updates and validation processes so all requests are authenticated

UI Developer Intern

November 2021 – February 2022

Comprinno Technologies

Bangalore, India

- Designed and developed interactive single-page web applications (**SPAs**) utilizing **Angular** framework for Tevico, the company's cloud-based software solution
- Implemented the **newest security patches** available in **Angular**, mitigating the risk of potential vulnerabilities by **90%**
- Coordinated with **cross-functional teams** to ensure seamless integration of company products

TECHNICAL SKILLS

Languages: HTML/CSS, JavaScript, TypeScript, Node, Java, SQL, NoSQL

Developer Tools: VS Code, Eclipse, Postman, Git, Git Bash, Jira, Trello

Technologies/Frameworks: React, Angular, Express, Docker, Nest, Bootstrap, Mongo, Spring, Rest API, Linux

PROJECTS

Pokemon Trainer Hub | MERN (MongoDB, Express, React, NodeJS)

- Empowered users with comprehensive Pokemon information and interactive gameplay mechanics through PokeAPI integration for **RESTFUL API** calls
- Implemented user authentication and authorization using **JWT** (JSON Web Tokens), ensuring secure and private access to user-specific data and features

Ampersand Discord Bot | NodeJS, MongoDB, Docker, Linux

- Developed Ampersand, a feature-rich Discord bot built with **NodeJS** for server-side operations and **MongoDB** for efficient data management
- Deployed on a **Linux-based** machine as a **Dockerized** application, ensuring 24/7 uptime through containerization

EDUCATION

Hislop College, Nagpur University

July 2018 – September 2021

Bachelor of Commerce and Computer Applications (BCCA) - CGPA: 7.5

Nagpur, Maharashtra

INTEREST / HOBBIES

- Reading, Workout, Guitar, Keyboard, Riding, Esports
